Experienced software engineer with over 3 years of expertise in web development, specializing in frontend and backend technologies. Proficient in JavaScript, React.js, Node.js, HTML, and CSS, with a strong understanding of modern web development principles and best practices. Demonstrated ability to deliver high-quality, scalable software solutions, collaborate effectively in cross-functional teams, and adapt to evolving project requirements. Passionate about continuous learning and staying updated with the latest technologies in the ever-changing field of web development.

## EXPERIENCE

---

### Grazitti Interactive Software Engineer | Chandigarh, India

01/2021 - Present

Orchestrated collaborative efforts between software development and testing teams to engineer bespoke solutions, achieving a remarkable 20% enhancement in functionality, scalability, and performance metrics, exceeding client expectations.

Conceptualized and implemented innovative technology solutions, consistently surpassing project benchmarks with a 15% uptick in efficiency and an impressive 20% reduction in response time, ensuring unparalleled project success and efficiency.

Conducted in-depth evaluations of software and hardware interfaces in tandem with engineers, resulting in a substantial 10% improvement in integration efficiency and a significant 15% reduction in interface-related performance issues, optimizing system functionality and performance.

## SKILLS

---

Web Development	HTML5, CSS3, JavaScript, React js, Bootstrap, Next js
Backend Development	Node js, Typescript
Testing	Postman
Version Control	Git

## EDUCATION

---

### Chitkara University, BEng in Computer Science | HP, India

07/2017 - 06/2021

## PROJECTS

---

### Leave Management App

[React, PHP]

Designed and deployed a web application automating leave, WFH, and on-duty requests, integrating custom logics to meet specific company demands, reducing request processing time by 30% and boosting employee satisfaction by 20%.

Coordinated with stakeholders to ensure seamless integration and optimize workflow efficiency.

### Hiring Portal

[React, Node.js]

Led the creation of the Hiring Portal at Grazitti Interactive, resulting in a 30% reduction in candidate onboarding time and a 25% increase in test completion rates post-registration.

### Real Estate Website

[React.js, Wordpress]

Lead the creation of a dynamic real estate website aimed at enhancing home purchasing efficiency and accessibility.

Achieve a 20% increase in user engagement through streamlined navigation and an intuitive interface.

Curate a database of 10,000+ property listings to cater to diverse buyer preferences, resulting in a projected 15% rise in successful home purchases within the first year of operation.

### Firewall Management Website

[React.js, Wordpress]

Spearheaded the creation of the "Firewall Management Website," streamlining IT infrastructure integration and enhancing team collaboration processes.

Implemented automated management features in the "Firewall Management Website," bolstering network security and ensuring compliance while navigating complexities in global operations and data protection.

### Chatbot

[React, ChatGPT API]

ChatBot, powered by ChatGPT API, delivers personalized interactions and seamless integration across platforms, enhancing user engagement and streamlining customer support for businesses.
