SUMMARY

Experienced software engineer with around 4 years of expertise in web development, specializing in frontend and backend technologies. Proficient in JavaScript, React.js, Node.js, HTML, and CSS, with a strong understanding of modern web development principles and best practices. Demonstrated ability to deliver high-quality, scalable software solutions, collaborate effectively in cross-functional teams, and adapt to evolving project requirements.

WORK EXPERIENCE

Grazitti Interactive   **Jan 2021 - Present**

- Orchestrated collaborative efforts between software development and testing teams to engineer bespoke solutions, achieving a remarkable 20% enhancement in functionality, scalability, and performance metrics, exceeding client expectations.
- Conceptualized and implemented innovative technology solutions, consistently surpassing project benchmarks with a 15% uptick in efficiency and an impressive 20% reduction in response time, ensuring unparalleled project success and efficiency.
- Conducted in-depth evaluations of software and hardware interfaces in tandem with engineers, resulting in a sub stantial 10% improvement in integration efficiency and a significant 15% reduction in interface-related performance issues, optimizing system functionality and performance

EDUCATION

B.tech in Computer Science   **AUG 2017 - AUG 2021**

Chitkara University

SKILLS

- HTML
- CSS
- JAVASCRIPT
- React Js
- Next Js
- Node Js
- Tailwind CSS
- Typescript
- Git

PROJECTS

- **Leave Management System**

A comprehensive Leave Management System designed to streamline and automate employee leave tracking, requests, and approvals.

- **Real Estate Website**

The Real Estate Website is a platform for buyers, sellers, and agents to explore property listings with detailed information, including images, pricing, and location

- **Admin Dashboard**

An admin dashboard for managing email template products, enabling efficient tracking of customer subscriptions.

- **Chat-Bot**

A conversational AI powered by ChatGPT APIs, designed to automate customer support and enhance user interactions .

- **Dental-Website**

This project involves the creation of a Dental-Website designed to provide a complete range of dental services.

- **Song Streaming Platform**

A music-sharing platform where users can upload their tracks, follow each other, create playlists, share music stories, and collaborate in groups

- **Hospital and Doctor Management fro NGO**

This project is a hospital and doctor management system for NGOs, designed to streamline the process of managing healthcare services.

ACHIEVEMENTS

- **Built and Optimized Scalable Web Applications**:Developed and deployed 10+ production-level React apps, improving performance by 40% through code splitting, lazy loading, and other optimizations.
- **Collaborative Cross-Functional Work**:Worked with UI/UX designers and back-end teams to create user-centric interfaces, enhancing user engagement and reducing bounce rates by 15%.
- **Leadership and Mentorship**:Led Agile development teams, mentoring junior developers, and fostering best practices in front-end technologies, including React, Redux, and state management.
- **Code Quality and Continuous Improvement**:Implemented unit testing, CI/CD pipelines, and automated deployment, improving code reliability, reducing deployment errors by 35%, and ensuring maintainable codebases.
